SUMMARY

Emerging Software Engineer skilled in HTML, CSS, JavaScript, Bootstrap, and database management (Oracle SQL, PL/SQL, MySQL). Experienced in building UI/UX Designs, responsive web apps and hands-on projects using GitHub, Docker, and Oracle APEX. Quick learner, detail-oriented, and eager to create innovative, user-friendly solutions.

EDUCATION

UNIVERSITY OF SARGODHA

2023 – 2027

Bachelors of Science in **Software Engineering - Current Semester(6th)**

CGPA : 3.81 / 4.00

Relevant Coursework: Object-Oriented Programming, Human Computer Interaction, Software Engineering, Web Engineering, Database Systems, Software Design & Architecture

SKILLS SUMMARY

- Web Technologies:** HTML/CSS, Javascript
- Database:** Oracle SQL, PL/SQL, RestAPI's
- Concepts:** OOP, Data Structures And Algorithms
- Tools:** Figma, Canva, Bootstrap, VS Code, Github, Cisco Packet Tracer, Mysql Workbench, Docker, Oracle Apex

PROJECTS

Notes Management | Personal Project

Developed a robust full-stack notes management application with secure CRUD operations using HTML, CSS, JavaScript, PHP, and Bootstrap. Optimized user experience through a clean, responsive interface and efficient backend data handling.

Smart Tailor System | Academic Project

Tailoring management system, focusing on intuitive UI/UX, seamless navigation, and user-centered workflows for order and measurement tracking. Created wireframes and implemented visually consistent, accessible interfaces using HTML, CSS, JavaScript, and Bootstrap.

Coffee Shop Website | Academic Project

Technologies: HTML, CSS, Javascript, Bootstrap

Designed a responsive coffee shop website to showcase the café's menu and brand identity with a modern, user-friendly interface. The project demonstrates front-end development skills and a strong focus on layout, navigation, and user experience.

CERTIFICATIONS

- Start Writing Prompts like a Pro
- Introduction to structured Query Language(SQL)
